

Lombard Odier Group Basel III Pillar 3 Disclosures at 30 June 2021

Contents

Introduction	03
Key metrics	04
Overview of risk-weighted assets	05
Information on the liquidity coverage ratio	05

Introduction

This document aims to provide our counterparties, external analysts, rating agencies, control bodies and our clients with detailed information relating to Lombard Odier Group's risk profile, including its regulatory capital, risk weighted assets (RWAs), liquidity and leverage exposures.

This report is produced and published twice a year in accordance with FINMA requirements and as prescribed in the circular 2016/1 'Disclosure – banks' which includes the implementation of the revised Pillar 3 disclosure requirements issued by the Basel Committee on Banking Supervisions (BCBS) in March 2017, the reporting frequency for each disclosure requirement is either annual or semi-annual. In accordance with the marginal number 14.2 of FINMA Circular 2016/1, Lombard Odier Group (the "Group") has limited the disclosures included in the report to the quantitative and qualitative information considered to be pertinent. More information regarding qualitative and quantitative Pillar 3 disclosures can be found in the document "Lombard Odier Group, Basel III Pillar 3 Disclosures at 31 December 2020" published in the media relations section of the Lombard Odier website.

It must be noted that the figures presented were individually rounded to the closest value depending on the scale chosen. They have not been adapted to match the totals, themselves also rounded to the closest value.

OV1 - Overview of risk-weighted assets

In t	housands CHF			
		Risk Weighted Assets	Risk Weighted Assets	Minimal Capital requirements
		30.06.2021	31.12.2020	30.06.2021
1	Credit risk (excluding CCR – counterparty credit risk)	2'084'514	1'983'160	166'761
2	of which standardised approach (SA)	1'868'910	1'800'725	149'513
	of which non-counterparty related risk	215'604	182'435	17'248
6	Counterparty credit risk	234'739	196'397	18'779
7	of which standardised approach for counterparty credit risk (SA-CCR)	234'739	196'397	18'779
10	Credit valuation adjustment (CVA)	67'142	56'916	5'371
14	Equity investments in funds – fall-back approach	2'060	2'228	165
20	Market risk	108'210	109'867	8'657
21	of which standardised approach	108'210	109'867	8'657
24	Operational risk	2'450'807	2'372'045	196'065
	of which basic indicator approach	2'450'807	2'372'045	196'065
25	Amounts below the thresholds for deduction (subject to 250% risk weight)	1'086	1'280	87
27	Total (1+6+10+12+14+15+20+24+25+26)	4'948'558	4'721'893	395'885

The increases of RWA for operational risk by CHF 78.8 million and for credit risk by CHF 68.2 million compared to year-end 2020 are respectively linked to the growth of the Group revenues and the credit activity line with the Group strategy during the first semester 2021.

Information on the liquidity coverage ratio (LCR)

Switzerland's Liquidity Ordinance and FINMA circular 2015/2 "Liquidity risks – banks" make it a regulatory requirement for the Group to calculate and monitor its liquidity coverage ratio (LCR). The LCR provides banks with a metric to assist them in ensuring that they hold a sufficient quantity of highly liquid assets to enable them to withstand a short-term (30-day) company-specific stress situation which coincides with a period of general market stress.

Composition of High Quality Liquid Assets ("HQLA")

Lombard Odier Group holds a pool of unencumbered HQLA that are readily available to meet cash-flow obligations under stress scenarios, as defined in the LCR rules. The liquid assets mainly include Level 1 HQLA, which comprises cash deposited to the Swiss National Bank, highly rated bonds issued by governments and supranational entities, and mortgage bonds.

Derivative exposure and potential collateral calls

Derivative exposures are mainly from, but not limited to foreign-exchange forwards and swaps and interest rate swaps. All derivative positions are marked-to-market daily, affecting the collateral amounts posted to and received from interbank counterparties and/or exchanges. Cash flows resulting from potential changes in collateral amounts posted/received are incorporated into LCR net cash outflows.

Concentration of funding sources

In addition to capital, client deposits represent the main funding source. They are diversified across the clients base. More than 50% of deposits are held into accounts with cash balances below CHF 5 million which represent more than 90% of the client accounts.
